1	proto 1	\$153.00	1/7/2025	W20250108 1005963		panel/pcb x5		me	jlc
2	proto 2	\$158.00	3/25/2025	W20250326 0530452		panel/pcb x5, alt panel x5		me	jlc
3	proto 3	\$264.00	4/17/2025	W20250417 1420693		panel/pcb x15	LOST cause wrong address - sent back to jlc	piggy bank	jlc
4	proto 4	\$250.00	4/24/2025	W20250425 0040578		panel/pcb x15		me	jlc
5	proto 5	\$254.00	6/4/2025	W20250604 2132687		pcb x5	(price is for supra boards from combo order) - notice how 5 boards is not much more expensive than 15, cause of 1 time setup fees, shipping etc. also this is the first order with the crazy tariffs	me	jlc
6	digikey proto mats	\$44.00				panel/pcb x15	44 w/ tax and shipping which was included in part of form w sensitive info		digikey
7	buydisplay 1	\$75.00	3/20/2024	100088176		displays		me	
8		\$170.00	3/31/2025	100090502		displays		me	
9	mouser 1	\$26.00	1/20/2025	273382125		prototyping components		me	mouser
10	mouser 2	\$30.00	3/26/2025	274325011		prototyping components		me	mouser
11	pre order leds	\$50.00	11/30/2025						
12	mouser 3	\$157.00	4/27/2025	274772916		production components		me	mouser
13	amazong	\$38.00						me

14	price equivilance					https://modulargrid.net/e/l-1-24-band-vocoder			
15	hours worked	\$0.00	12/1/2023				sooo many, can't believe it - been working since around dec 2023 on the earliest earliest prototypes. Can't believe I'm not even paying myself!!! (hehe jkjk) to be fair I think I'm probably better at balatro than making modules, might be a similar hour count on SUPRA, really don't know. DanT has released 20 VCV rack modules in the last 5 years, but that's software so hours don't count! (we love you DanT). I'm the first hardware VCV developer becuase I don't make money

16	profit equivilance						supra costs about \$38 in raw materials. say retail is about \$160. Say Distributors buy it from me for 75% of the cost (\$120) means I would make say, \$80 net per unit. Meaning I would recoup costs after selling 22 units. To compete with an engineering salary I would have to sell ~1800 units (2 yrs crappy engineer salary \$70k). And it would be more because I would contract for assembly at scale etc. etc. that's why I think of modules like balatro, and not like an engineering job lol. I think if I had to do it for a living it would def be way more stressful. Don't work for raytheon kids		
17	supplement	\$170.00	12/22/2025						
		SUM \$1,839.00
